

# FEBRIANSCAH

Data Analyst

0813-1997-3658   febrianscah20@gmail.com   Jakarta, Indonesia

## ABOUT ME

Information Systems graduate with hands-on experience as a Data Analyst Intern and Teaching Assistant. Skilled in Python, SQL, Excel, Power Query, and Google Looker Studio for data cleaning, analysis, visualization, and dashboard development. Strong analytical and problem-solving abilities supported by national-level achievements in mathematics and physics.

## EDUCATION

|                                |                                                                                                                                                                                               |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sep 2022 – Jul 2026            | <b>Bachelor of Information Systems</b>                                                                                                                                                        |
| <b>STT Terpadu Nurul Fikri</b> | GPA: 3.88 / 4.00. Focused on information systems, data analysis, database management, programming, and technology-driven problem solving.                                                     |
| Feb 2025 – Jun 2025            | <b>Data Science Program</b>                                                                                                                                                                   |
| <b>STT Terpadu Nurul Fikri</b> | Studied data analysis, statistics, data processing, and machine learning fundamentals. Final Score: 90 / 100.                                                                                 |
| Sep 2024 – Jan 2025            | <b>Machine Learning Path</b>                                                                                                                                                                  |
| <b>Bangkit Academy</b>         | Independent Study Program in collaboration with Google, GoTo, Tokopedia, and Traveloka. Studied machine learning, data analysis, TensorFlow, and model development. Final Score: 88.70 / 100. |

## EXPERIENCE

|                                |                                                                                                                                                                                                                                                                                     |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mar 2026 – Jul 2026            | <b>Teaching Assistant</b>                                                                                                                                                                                                                                                           |
| <b>STT Terpadu Nurul Fikri</b> | Assisted lecturers in Data Structures & Algorithms and Digital Image Processing courses. Explained technical concepts, guided students during laboratory sessions, and supported problem-solving and implementation exercises.                                                      |
| Apr 2025 – Aug 2025            | <b>Data Analyst Intern</b>                                                                                                                                                                                                                                                          |
| <b>PT Taharica</b>             | Performed data cleaning, processing, and exploratory data analysis to support business decision-making. Developed dashboards and reports, analyzed trends and patterns, and collaborated with cross-functional teams to translate business requirements into data-driven solutions. |

## SKILLS

- |          |                   |                        |                      |
|----------|-------------------|------------------------|----------------------|
| • Python | • Microsoft Excel | • Google Looker Studio | • Data Visualization |
| • SQL    | • Power Query     | • Pandas & NumPy       | • EDA                |

## PROJECTS

### Gayanara E-Commerce - Revenue Loss Analysis

Built an interactive dashboard analyzing revenue, revenue loss, products, locations, and customer reviews. Identified Rp229.16M revenue loss (20.70%) from Rp1.11B potential revenue and analyzed 1,500 customer reviews.

### SakuNusa - Financial Management Application

Developed a TensorFlow-based machine learning model to detect anomalies in financial transaction data. Analyzed transaction patterns and collaborated with Machine Learning, Cloud Computing, and Mobile Development teams.

### Sales Dashboard — Personal Project

Created an interactive sales dashboard using Google Looker Studio to analyze sales data and visualize business performance through key metrics and trends.

# ACHIEVEMENTS

|             |                                                                                                                                                                                                  |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025        | <b>Gold Medalist Gold Medalist (A+) — OSSN, Physics(A+)</b><br>National-level Physics competition for higher education, held in Yogyakarta, representing STT Terpadu Nurul Fikri.                |
| 2025        | <b>Gold Medalist (A+Gold Medalist (A+) — OSAHP, Mathematics)</b><br>Higher education-level Mathematics competition held in Balikpapan, representing STT Terpadu Nurul Fikri.                     |
| 2021        | <b>Top 15Top 15 — Mathematics Literacy Analysis Competition (KALM-A)</b><br>Ranked among the Top 15 at the high school level, competing across Banten and Jabodetabek.                           |
| 2020 – 2021 | <b>National Science Competition (KSN) — Mathematics</b><br>Selected as a city/regency-level participant for two consecutive years at the high school level.                                      |
| 2019        | <b>2nd Place — Mathematics Competitions</b><br>Achieved 2nd place in the Mathematics Olympiad at MTsN 2 Bogor and 2nd place in the SMP/MTs KOMPASS Mathematics Competition at SMAN 1 Leuwiliang. |
| 2018        | <b>1st Place &amp; National Top 20 — Mathematics Olympiads</b><br>Won 1st place in the Mathematics Olympiad at MTsN 2 Bogor and ranked Top 20 nationally at the OPTIKA 18 Mathematics Olympiad.  |
| 2014        | <b>3rd Place — Calistung Competition</b><br>Achieved 3rd place in the Reading, Writing, and Arithmetic Competition at the Leuwisadeng sub-district level.                                        |
